INTERNATIONAL SEARCH REPORT

A. CLASSIFICATION OF SUBJECT MATTER: US CL :

427/503, 515; 428/447, 448; 522/40, 41, 42, 43, 44, 45, 46, 47, 48, 53, 67, 68, 99, 148, 170, 172

BOX II. OBSERVATIONS WHERE UNITY OF INVENTION WAS LACKING This ISA found multiple inventions as follows:

This application contains the following inventions or groups of inventions which are not so linked as to form a single inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must be paid.

Group I, claim(s) 1-24, drawn to a radiation-curable release composition and method of producing a release coated substrate, classified in Class 522, Subclass 99.

Group II, claim(s) 25-26, drawn to a multilayer article comprising two substrates, a release layer of the radiation-curable release composition and a pressure sensitive adhesive layer, classified in Class 428, Subclass 447.

The inventions listed as Groups I and II do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The claims of the first Group do not require the technical features of a pressure sensitive adhesive layer and a second substrate set forth in the claims of the second Group.

Form PCT/ISA/210 (extra sheet)(July 1992)#
